---

## PROJECTS

---

### Naj Auctions || Next Js

- Naj Auctions is a Next.js-powered website offering a comprehensive platform for users to participate in car auctions. It allows users to place bids, manage their profiles, and sell their own vehicles. With a user-friendly interface and secure transaction handling, Naj Auctions simplifies the auction process for both buyers and sellers in the automotive market

### TenTen Operation Dashboard || React

- In this project, I am actively involved in integrating essential services into our dashboard, enhancing its functionality and providing users with a comprehensive and streamlined experience.

### TenTen Pay Website || React || Next js

- Tenten Pay's website provides a comprehensive overview of the app's features, making it easy for users to understand its benefits. It also offers convenient options for app downloads and access to customer support for assistance.

### Fees Engine || React || Micro-Frontend

- The Fee Engine is a micro-frontend-based service designed to calculate transaction fees dynamically based on specific providers. This modular approach allows the engine to be integrated seamlessly across three different dashboards, ensuring consistent and efficient fee calculations tailored to various business needs
-

---
